

April 14, 1998

TO: Members of the MAG Air Quality Technical Advisory Committee

FROM: Harry Mitchell, Chairman

SUBJECT: MEETING NOTIFICATION AND TRANSMITTAL OF TENTATIVE AGENDA

Tuesday, April 21, 1998 - 1:30 p.m.
MAG Office, Suite 200 - Saguaro Room
302 North 1st Avenue, Phoenix

Please park in the garage under the Norwest Bank Building,
bring your ticket, parking will be validated.

Please be advised that under procedures approved by the MAG Regional Council, all MAG committees need to have a quorum to conduct the meeting. A quorum is a simple majority of the membership. If you are unable to attend the meeting, please make arrangements for a proxy from your entity to represent you.

If you have any questions, please do not hesitate to contact Lindy Bauer at 254-6300.

TENTATIVE AGENDA

	<u>COMMITTEE ACTION REQUESTED</u>
1. <u>Call to Order</u>	
2. <u>Approval of the March 12, 1998 Meeting Minutes</u>	2. Review and approve minutes of the March 12, 1998 meeting.
3. <u>Most Stringent PM-10 Control Measures</u> On October 29, 1997, the MAG Regional Council took action to direct staff to prepare a request for up to a five-year extension of the PM-10 attainment date, since it appeared that attainment by December 31, 2001 was impracticable. Sierra Research was the consulting firm	3. For information, discussion, and recommendation to approve fourteen potential measures for consideration which may be the most stringent in any state for PM-10 sources located in the Maricopa nonattainment area and request that the potential implementing entities consider them for implementation, if feasible.

selected by the Regional Council to provide assistance with the extension request.

According to the Clean Air Act, the extension request is required to demonstrate that the PM-10 Plan includes the most stringent measures that are contained in any state plan, or are achieved in practice in any other state, and that are feasible in this area. Sierra Research has identified fourteen potential measures for consideration which may be the most stringent in any state for PM-10 sources located in the Maricopa nonattainment area.

These measures were presented to the Governor's Air Quality Strategies Task Force, Air Quality Technical Advisory Committee, Management Committee, Air Quality Policy Committee, and Regional Council in January and February 1998.

A copy of the April 9, 1998 draft report is enclosed. Additional Appendices and a discussion of the most stringent transportation control measures will be available at the meeting. Please refer to the enclosed material.

4. Proposed Moderate Area PM-10 Federal Implementation Plan for Unpaved Roads, Vacant Lots, and Parking Lots

On April 1, 1998, the Environmental Protection Agency published the proposed Moderate Area PM-10 Federal Implementation Plan for the Maricopa nonattainment area. The federal plan includes a fugitive dust control rule to control PM-10 emissions from vacant lots, unpaved parking lots and unpaved roads. It also addresses PM-10 emissions from agriculture. As ordered by the court, the federal plan will be finalized by July 18, 1998.

4. For information and discussion.

The notice also contains a disapproval of the 1994 attainment impracticability and reasonably available control measure demonstrations. Once the disapproval action is finalized, the eighteen-month sanction clock will be triggered. Please refer to the enclosed information.

5. Legislative Update

An update will be provided on the status of the air quality bills in the Arizona Legislature.

6. Call to the Public

An opportunity will be provided to members of the public to address the Air Quality Technical Advisory Committee.

7. Next Meeting

The next meeting of the Air Quality Technical Advisory Committee is tentatively scheduled for May 14, 1998.

5. For information and discussion.
